AIRlert™ LIVE BOARD · Frequency Precision

A pleasant A4 lookbook of LIVE board moments: AI Message graphs, bed occupancy through the night, event cards, Category Alerts traffic, WhatsApp respond actions, and carer thumbs feedback. At most four rounded windows per page, each with a numbered one-line caption.

FREQUENCY PRECISION®

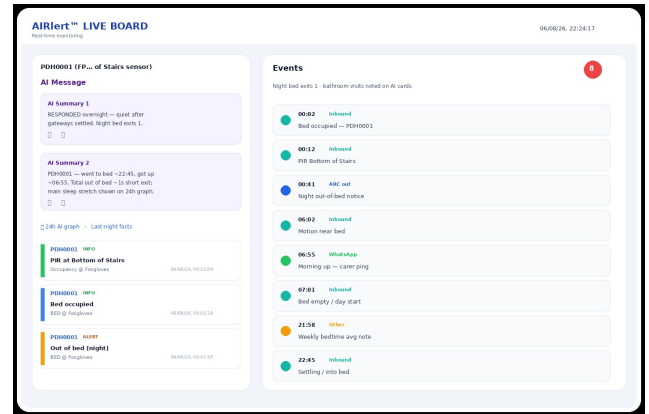

AIRlerT™

1

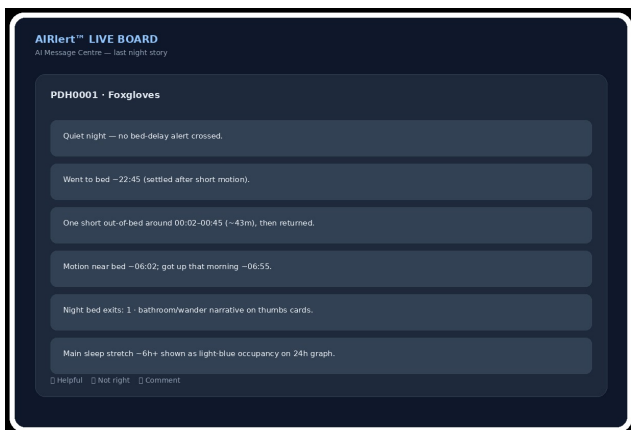

(1) AI Message board 24h graph — night grey band, bed-occupancy bars, and event dots for that night's in/out-of-bed story.

2

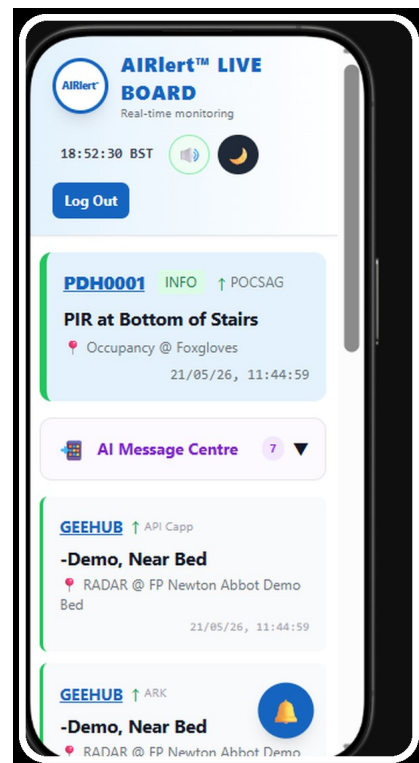

(2) LIVE board with PDH0001 AI night summaries, thumbs, and the events panel listing bed, PIR, and morning-up traffic.

3

(3) Canonical overnight AI story: bedtime, one night exit with duration, morning get-up, and thumbs feedback.

4

(4) Phone LIVE board feed — PDH0001 PIR at Bottom of Stairs plus GEEHUB near-bed RADAR cards with AI Message Centre badge.

FREQUENCY PRECISION®

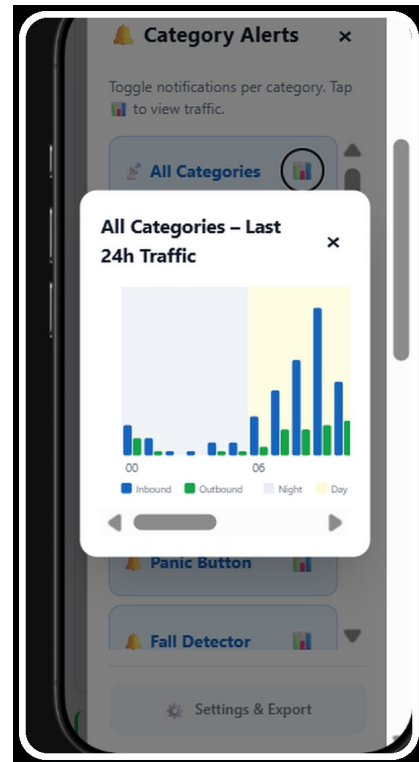

AIRlerT™

5

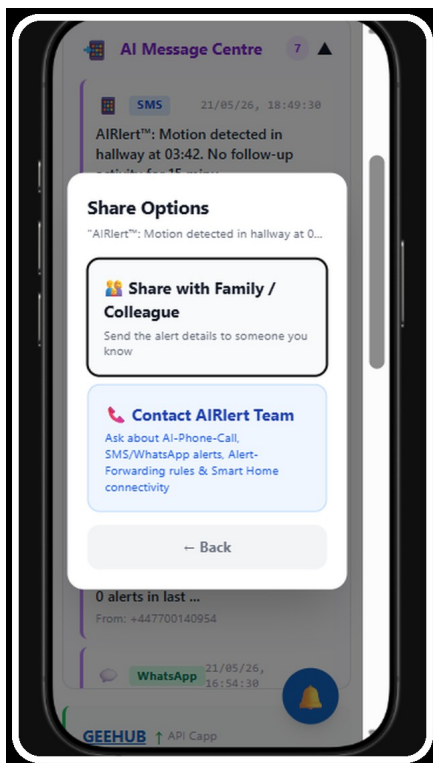

(5) AI Message Centre open — SMS, Call, and WhatsApp alert cards with timestamps and From numbers.

6

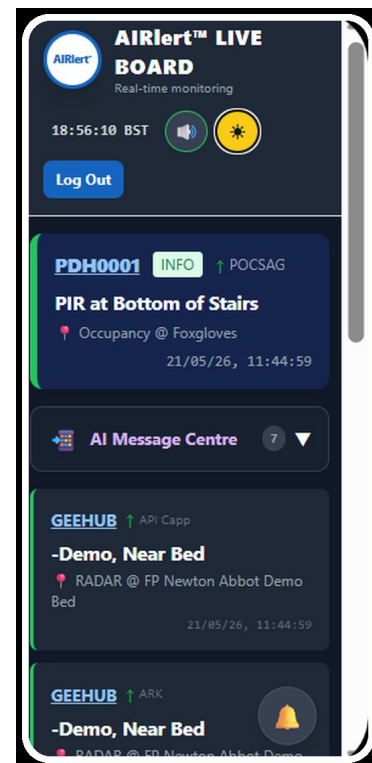

(6) Category Alerts 24h traffic graph — quiet night band then inbound/outbound spike after ~06:00 get-up.

7

(7) Share Options on a hallway-motion AI alert — send to family/colleague or contact the AIRlerT team.

8

(8) Dark-mode LIVE board — same real-time event cards and AI Message Centre entry under night theme.

AIRAlert™ · Frequency Precision · draft review · p.4/6

FREQUENCY PRECISION®

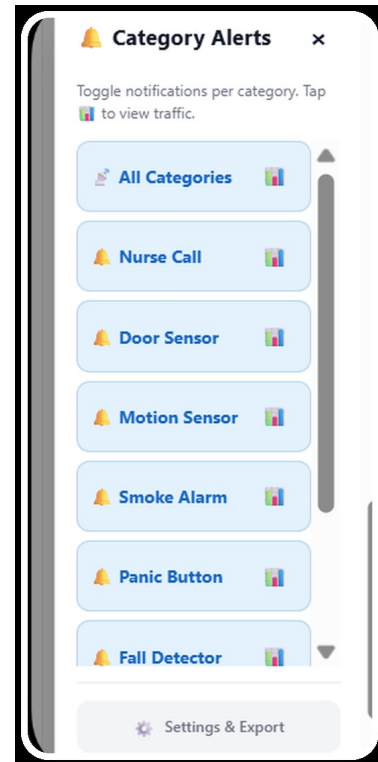

AIRAlert™

9

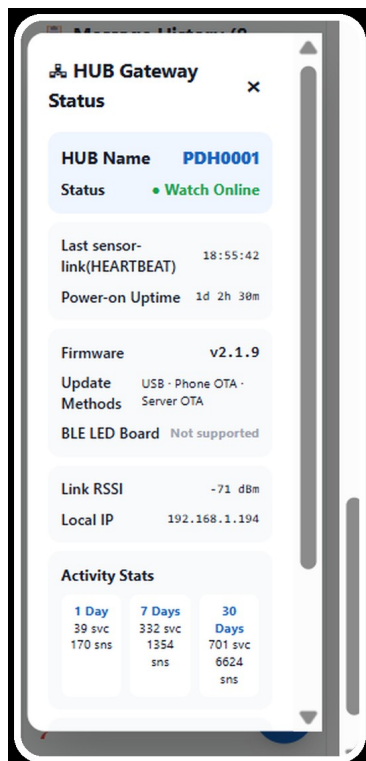

(9) Alert Match Type chooser over a live PDH0001 PIR event — keyword / full / exact matching for future alerts.

10

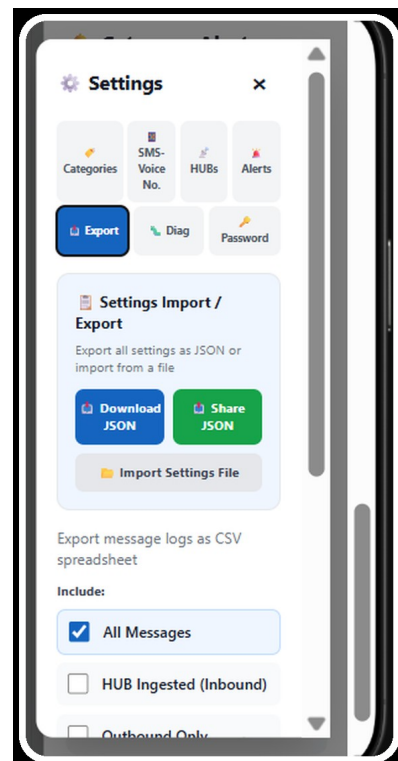

(10) Category Alerts list — toggle Nurse Call, Door, Motion, Smoke, Panic, Fall; Settings & Export at the bottom.

11

(11) HUB status view from LIVE board — gateway online/late cues that back the AI summaries.

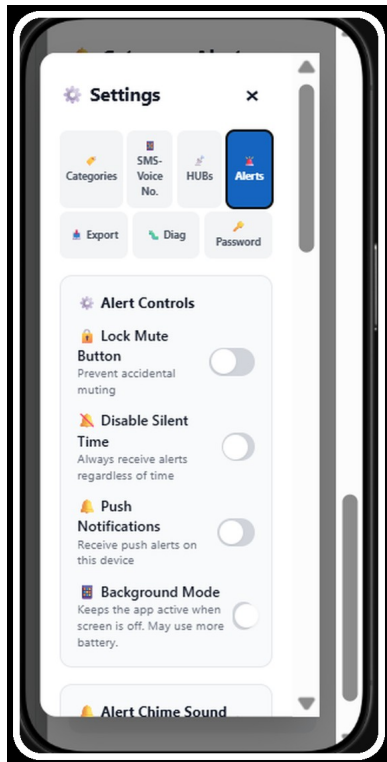

12

(12) Settings Import/Export — download or share JSON and export message logs as CSV from LIVE board.

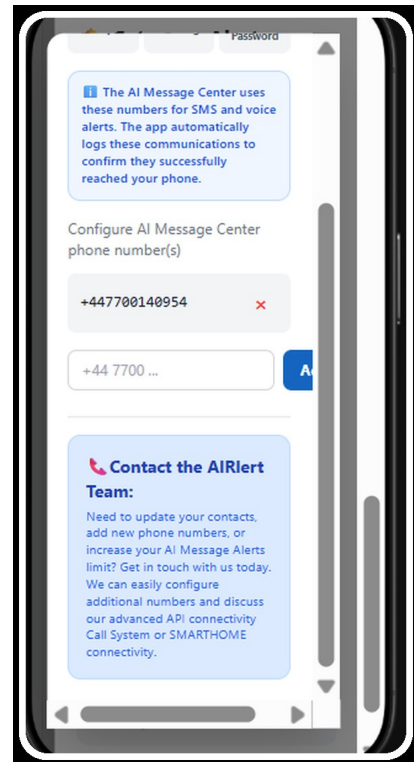

13

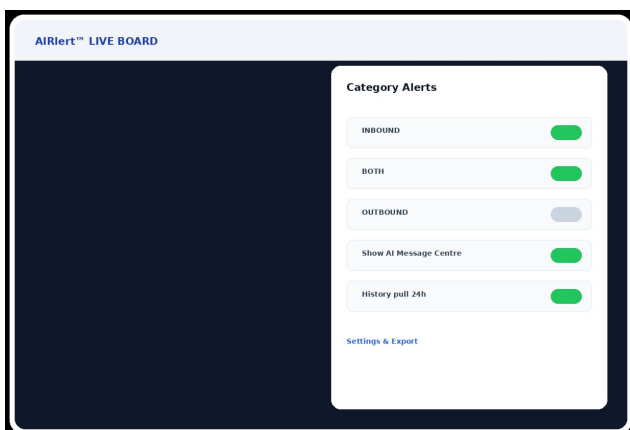

(13) Settings → Alert Controls — lock mute, silent time, push, and background mode for LIVE board carers.

14

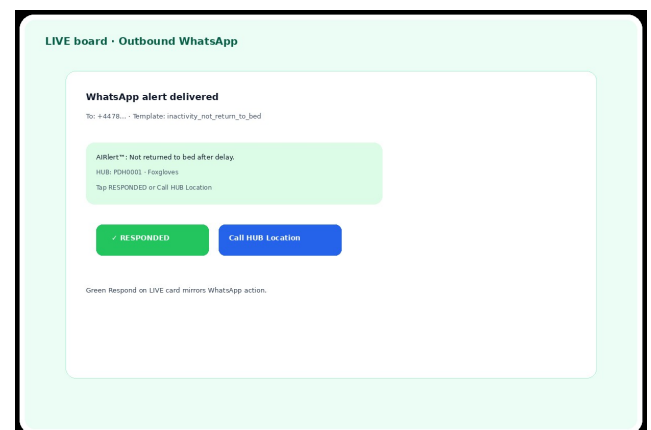

(14) Contact AIRAlert team from LIVE board — update SMS/voice numbers and AI Message alert limits.

15

(15) Category Alerts drawer — INBOUND/BOTH/OUTBOUND plus Show AI Message Centre and History pull window.

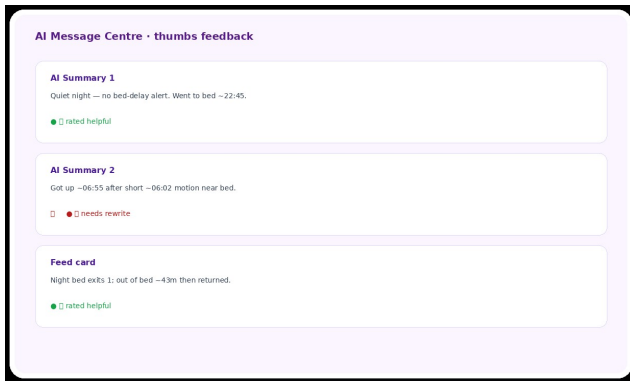

16

(16) WhatsApp outbound from LIVE — RESPONDED and Call HUB Location buttons on a not-returned-to-bed alert.

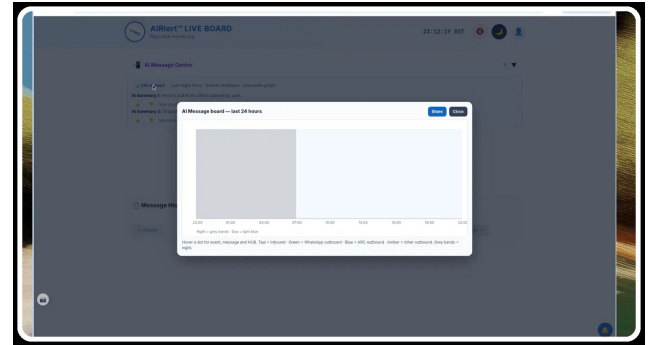

17

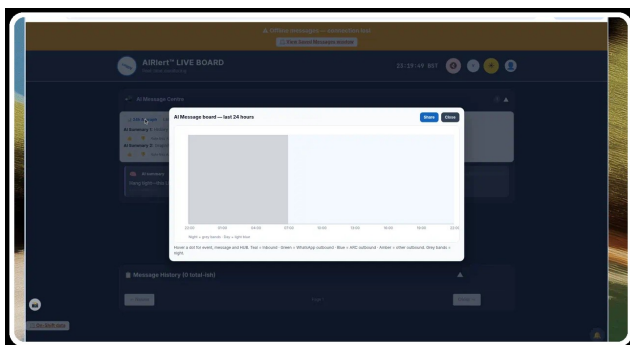

(17) Thumbs up/down on AI night cards — carers mark helpful or “needs rewrite” against HUB + user.

18

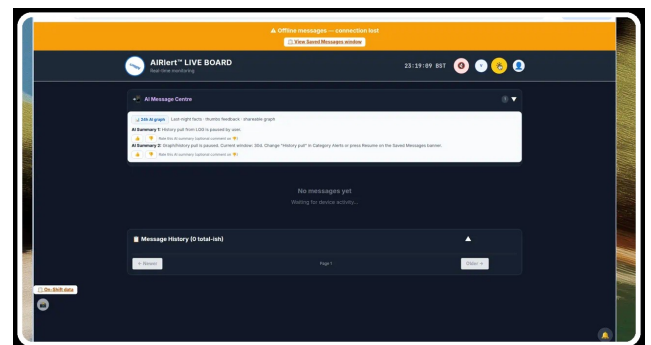

(18) Live mirror UI: AI Message board — last 24 hours modal with night shading and Share/Close (chrome of the real graph).

19

(19) Dark-mode AI Message board graph modal on the live dashboard — same 24h night/day canvas carers open from AI Centre.

20

(20) Dark LIVE board shell — AI Message Centre, 24h graph link, Message History, and night-mode header controls.
